The Gladiolus

A delightful flower for the home garden. It grows from bulbs which increase in number from year to year. Plant them in shallow furrows any time in late April, May or June. Then keep the weeds down and the ground stirred occasionally. That is all there is to it except the cutting of the great spikes of wonderful lily-like blooms which last ten days to two weeks in water. Dig up the bulbs in late fall and carry them over winter like potatoes in your cellar. Gladioli are just the flower for the renter. One can always move bulbs. Remember we pay transportation on all stock you order.

FANCY MIXED. A really superb blend of the finer sorts showing almost every shade and marking to be found in Gladioli. Try a hundred of these, planting in four lots at intervals of two weeks. They will give a succession of flowers for cutting from late July until frost and you will find more bulbs than you planted when you come to dig in November. Dozen 45c; 50 for \$1.75; 100 for \$3.25; 500 for \$14.00.

NEW HYBRIDS. An extra early strain running largely to shades and tints of primrose, saffron, apricot, bronze, blush and rose. Price, same as Fancy Mixed.
